

McCALL

Marine Service

Keeping Your Boating Dream Afloat

2023 Winterization Services

OK to winterize my boat AFTER: _____

Minimum of two weeks advance notice recommended

To help protect your boat from freezing it is recommended that you email your completed form **before October 15th**. Please be aware all agreements are scheduled on a first come, first service basis. It is your responsibility to have holding tanks empty and fuel tanks should be 3/4 full before winterization is performed. Also, please remove all freezable items (alcohol, food, beverages, canned good, etc.) from your boat. De-winterizing of your boat in Spring will be necessary and is not included in this agreement. McCall Marine assumes no responsibility for improperly de-winterized boats performed by owners or outside vendors. De-winterizing information will be

sent to you in early spring. Unless we have written "Special Instructions", after winterizing we will leave the shore power cords as we found them, turn the batteries off and leave the battery charger ON. As is applicable, winterizing includes: engine(s), generator, water systems, head systems, A/C systems, washer/dryer, seawater wash-downs, heat exchangers, shaft coolers, transmission oil coolers and sea strainers. We use the blue -100 degree F environmentally safe antifreeze with corrosion inhibitors for maximum protection.

Please check the appropriate boxes authorizing services requested:

PRICES REFLECT LABOR ONLY
